INTEGRATED SOLAR STREET LIGHT

We turn
SUNLIGHT
into Power

“FIT & FORGET” Solar Smart Light in FRP Body encases PV Panel, LED Lamp, Lithium Battery & Charge Controller Driver in one unit. Ideal replacement which overcome all the drawbacks of conventional solar street light.

Renewable | Reliable | Remarkable

Integrated Solar Street Light

Area of App.

- ◆ Street Lighting
- ◆ Yards/Parks
- ◆ Farm House,
- ◆ Boundary Wall
- ◆ Security Lighting
- ◆ Airport
- ◆ Chemical/Oil & Gas
- ◆ Coastal Area

1. Delivers the best in class lumen efficacy and maximum light output with minimum wattage consumption.
2. Smart and Compact design, Fully Renewable, Economical and Environmental friendly, IP65, Rust & Dust Proof, Using Lithium Battery ensures Zero maintenance and Long Life.
3. Automatic Dusk to Dawn operation with Built in PIR Motion sensor which detects and automatically regulate the light output from full bright (100%) to the energy saving mode output (50%) after fixed hours (4/5) to increase battery life and autonomy.
4. Easy and instant installation with Universal Mounting bracket suitable for mounting on a wide variety / size of new / existing pole/wall.
5. Advantage of using FRP : **Customized colour theme option**, Light weight, high mechanical and impact strength, long life, Electrical and thermal insulating, antimagnetic/antistatic, no spark, corrosion resistant.

Available Models :
AXN-08/12/16/20/24 watt

With GSM / RF
Switching option

All in one Portable Solar Power Pack Suitcase

150VA Portable Solar Power station with high efficiency mono crystalline PV Panel, hybrid inverter with pure Sinewave 230 V, 50 Hz, AC output with Lithium battery for power backup.

Area of App. : Off Grid location, Construction Site, Defence application, rescue operation, Rural application etc.

📍 H-364, Heavy Industrial Area, Sangaria Phase II, Jodhpur 342 013(Raj.) INDIA
